PROGRAMMING TIPS FOR BEGINNERS

@trishan9

01

Don't watch tutorials
like a Netflix series

Do more practice
rather than watching
videos

Don't switch
languages again &
again

02

Master one
language first

03

Be consistent

Code everyday, even if you don't have much time, Give at least 30 mins.

Don't hide from difficult problems

04

Start from easy problems and work your way up, but never skip problems that looks difficult.

**SAVE THIS POST IF
YOU FIND IT **USEFUL****

@trishan9

**LEARNING PROGRAMMING CAN BE
CHALLENGING AT TIMES, BUT WITH
DETERMINATION AND CONSISTENCY, YOU'LL
MAKE STEADY **PROGRESS.****
